Lexington, NC 27292

Re: Permit to Operate - Phase 2 Area 1  
Davidson County MSW Lined Landfill  
Davidson County, North Carolina  
Permit No. 29-06  
Doc ID No. 6356

Dear Mr. Brushwood:

Attached is a Permit to Operate the above referenced municipal solid waste landfill facility. Please review the permit carefully. According to 15A NCAC 13B .0203(d), by receiving waste the applicant shall be considered to have accepted the conditions of the permit. The Permit shall expire July 27, 2011. Pursuant to 15A NCAC 13B .0201(e), no later than March 27, 2011, the permittee must submit an application for amendment or modification to the permit for review to the North Carolina Department of Environment and Natural Resources (Department), Division of Waste Management (Division), Solid Waste Section (Section).

A detailed Leachate Management Plan needs to be submitted within 90 days which includes periodic maintenance (describe in detail), maintaining records of leachate generated, and contingency plans for extreme operational conditions. This plan would include inspecting and maintaining all leachate lines in and out of the landfill.

If you have questions about the permit conditions or questions arise during construction, please contact either me at (704) 235-2163 or Hugh Jernigan, Waste Management Specialist for the facility, at (336) 771-5093.

Sincerely,

John Murray, P.E.  
Regional Engineer
